Introduction

The 'Principles of Management' course is designed to provide a comprehensive understanding of two key areas. The first part of the course focuses on the concept of an organization and the role of management within it, exploring its various functions. The second part introduces the fundamentals of financial reporting, providing a solid foundation in understanding financial statements. This course offers a balanced blend of theoretical knowledge and practical insights, making it an essential learning experience for those interested in the fields of law and management and to pursue a master degree in law and management.

Goals

This course aims at leading the students to:

1. understanding what is an organization and what is management and its functions; and
2. understanding the basics of financial reporting and the financial statements.

Methods

Students have 2 classes of 4 hours each.
